Lesson 14

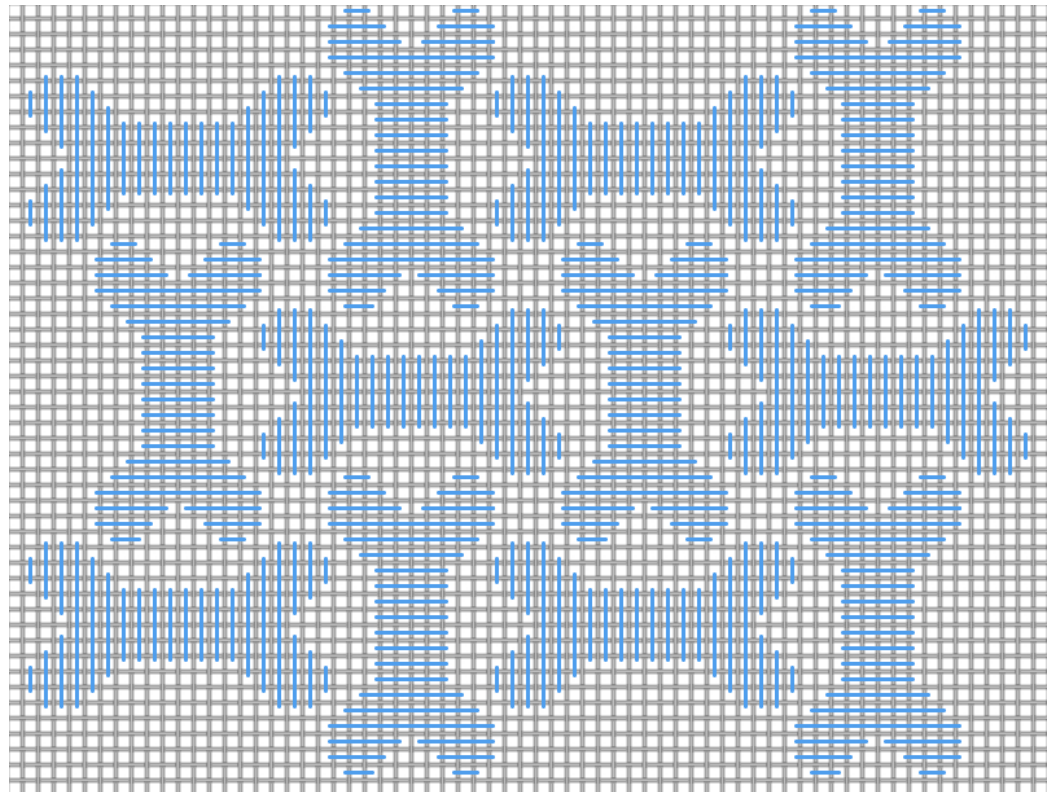

### Dog (Bone)Background Patterns

My husband and I both severed on the BOD at the Lexington Humane Society and we just kept bring them home... we have 5 (small) dogs that are spoiled rotten, but they are a joy to us. I designed an interlocking dog bones pattern for a student which was used as a background. Since then I have changed the size and shape about 6-7 times! It can be resized to fit the proportion of the design area as needed. Like the previous fish pattern, ensure the background is 'lite' and a good match to the color it will be stitched on. It would be easiest if either pattern is worked on a diagonal. Stitch these patterns with Petite Silk Lane or Elegance (which is a silk size 8 pearl).
